

IF YOU WANT TO KNOW MORE

State-Specific Information

Medicare is a health insurance program for:

- People age 65 or older
- People under age 65 with certain disabilities
- People of all ages with End-Stage Renal Disease (permanent kidney failure)

Starting January 1, 2006, all people with Medicare can enroll in a plan that covers prescription drugs.

Your state may have special programs or procedures that relate to the new Medicare prescription drug coverage. This folder is provided for you to store the state-specific materials you need to help people decide about enrolling in a Medicare prescription drug plan.

These materials were prepared in March 2005 by the Centers for Medicare & Medicaid Services. They are intended for training purposes only and are not legal documents.
